# Uniting 3 nations is possible through their real interest rates

Soumadeep Ghosh

Kolkata, India

**Abstract**

In this paper, I describe how uniting 3 nations is possible through their real interest rates. The paper ends with "The End"

## Uniting 3 nations is possible through their real interest rates

The system

$$x(x,y,z) = ax^2 + bx + cy^2 + dy + ez^2 + fz + g$$

$$y(x,y,z) = hx^2 + ix + jy^2 + ky + lz^2 + mz + n$$

$$z(x,y,z) = ox^2 + px + qy^2 + ry + sz^2 + tz + u$$

$$x = y = z$$

$$x(x,y,z) = y(x,y,z) = z(x,y,z)$$

$$aho \neq 0$$

$$0 < x < \frac{5}{200}$$

where

$a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u$ are real coefficients

has the solution

$$a = \frac{7}{600}, b = 0, c = \frac{1}{600}, d = -\frac{1}{300}, e = \frac{1}{240}, f = -\frac{1}{150}, g = \frac{26119}{3840000}$$

$$h = \frac{1}{600}, i = -\frac{1}{240}, j = -\frac{7}{1200}, k = -\frac{11}{1200}, l = -\frac{1}{400}, m = \frac{1}{1200}, n = \frac{52507}{7680000}$$

$$o = \frac{1}{400}, p = \frac{1}{1200}, q = \frac{1}{240}, r = -\frac{1}{200}, s = \frac{11}{1200}, t = \frac{1}{200}, u = \frac{1}{150}$$

$$x = \frac{1}{80}, y = \frac{1}{80}, z = \frac{1}{80}$$

Uniting 3 nations is possible using this solution to the system.

## The End
