

The cabal

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I describe the cabal.
The paper ends with "The End"

Introduction

In previous papers, I've described various organizations including the market, the firm, the temple/mosque/church, the jail, the bazaar, the company, the corporation, the multi-national corporation, the hospital and the academy.

In this paper, I describe the cabal.

The cabal

The cabal is the **holy grail** of all individuals who demand control over their nation.

In almost all cases in the world, ownership of a cabal is reserved for the sovereign and the royal family, high-ranking military officers, major industrialists and high-ranking administrative officers of that nation.

Invariably in the world, the owners of a cabal are bound by duty and honour to their nation. Not all nations have such honour and therefore, there are very few nations that have cabals.

Synonyms of cabal

Cabals throughout history have also been called **conglomerates** or **mega-companies**.

The mathematics of the cabal

The mathematics of the cabal is

$$\Xi = \frac{\sum_{i=1}^n w_i C_i}{\sum_{i=1}^n w_i}$$

where

Ξ is the **total capital** of the cabal

n is the number of companies in the cabal

w_i is the **weight of the i^{th} company** in the cabal

C_i is the **capital of the i^{th} company** in the cabal

The End
