

The role of the devil in the levy

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I describe the role of the devil in the levy.
The paper ends with "The End"

Introduction

The **levy** is the ultimate defense of a capital.

The levy is characterized by the union of all individuals of a capital into a **large** individual and fighting by that large individual against the invading military.

However, this is **not** possible without the devil playing a role in the levy.

In this paper, I describe the role of the devil in the levy.

The role of the devil in the levy

Let $0 \leq L < 1$ be the life of the large individual of levy.

Then $D_0 = \frac{1}{1-L}$ is **the devil's number**.

More specifically,

$$D_0 = 1 + L + L^2 + L^3 + L^4 + L^5 + \dots$$

Going further, $D_1 = \frac{1}{1-D_0L} = 1 + L + 2L^2 + 4L^3 + 8L^4 + 16L^5 + \dots$

and so on.

Since infinite series are the work of the devil, **the devil too has a role to play in the levy**.

The End
