Abstract

In this paper, I describe the military strategy known as Blitzkrieg.
The paper ends with "The End"

Introduction

Blitzkrieg is a military strategy designed to
paralyze the enemy nation with quick and overwhelming nuclear attacks.
In this paper, I describe blitzkrieg.

Blitzkrieg

Blitzkrieg starts at $t = 0$ and ends at $t = T = 7$ with an **arbitrary** unit of time.
The relative nuclear damage to be caused is listed below:

t	$D(t)$
0	0
1	2
2	5
4	4
5	3
6	3
7	4

Surrender by the enemy happens at $t = T$

The End
