

# India is at war and is participating in World War 4

Soumadeep Ghosh

Kolkata, India

## Abstract

In this paper, I describe why India is at war and is participating in World War 4.  
The paper ends with "The End"

## Introduction

As predicted by me in a previous paper, India is already at war and is participating in World War 4.

In this paper, I describe why India is at war and is participating in World War 4.

## Modi's India

In research already published by me, we have determined that the death rate in India is directly proportional to Narendra Damodardas Modi being the so-called "Prime Minister of India".

In spite of common knowledge among Indians that Narendra Damodardas Modi has committed TREASON against India, the so-called "Government of Delhi" is in psychological denial and refuses to acknowledge just where Narendra Damodardas Modi is and what will be India's role in World War 4.

## Modi is a coward and a mass-murderer of his own people

The truth is that Narendra Damodardas Modi, in spite of his so-called 56-inch chest, is a **coward** and a **mass-murderer** of his own people.

The only question left now is "Are the rest of the Indians as cowardly as Narendra Damodardas Modi as well?"

## The answer to the question?

If the answer to the question is "Yes, the rest of the Indians are equally cowardly." then India will **cease to exist**.

If the answer to the question is "No, the rest of the Indians are brave." then the rest of India has to prove its mettle in battle.

## India's position in the world

India's position in the world is secure for now by her nuclear weapons.

But that security is at great risk and is threatened, ironically, by **fascists** like Narendra Damodardas Modi and his so-called allies, all of whom are ready to stab him in the back, not if, but when the opportune moment arrives.

## Why does Modi continue to degrade himself on the world stage?

It's also common knowledge, via social networks, that Narendra Damodardas Modi has been **humiliated** by even traditional Indian allies like Russia.

The video is linked for reference: <https://www.youtube.com/watch?v=XdSi57r93sU>

## Why does Modi lack self-confidence?

Therefore, another question is "Why does Modi lack self-confidence?"

Is it perhaps because of his **old age**, or perhaps because he knows he's **near death**? Is he **afraid** or maybe even **hopeful** that India would be defeated in World War 4? Or was he perhaps the **useful idiot** that the right-wing Indian media portrayed him as all along?

If the answer to this question is "Yes" then dark days are indeed ahead for India.

## India is at war and participating in World War 4

Therefore, in one way or another, India is at war and is participating in World War 4.

## The End
