Abstract

In this paper, I describe the military strategy known as Clausewitz.
The paper ends with "The End"

Introduction

Clausewitz is a military strategy, to be deployed by the sovereign of a nation, designed to defend and retain as much territory of the nation when attacked by an aggressor nation.
In this paper, I describe clausewitz.

Preliminaries

Let (x_i, y_i) where $i \in \{1, 2, 3, \dots, C\}$ be the C **capitals of the nation**.
Let H be the **convex hull** of the C capitals. Then H is the **area to be defended**.
Let $(X_j, Y_j) \in H$ where $j \in \{1, 2, 3, \dots, B\}$ be the $B < C$ **military bases of operation**.
Let $D = \{d_i^j : d_i^j = \sqrt{(x_i - X_j)^2 + (y_i - Y_j)^2}\}$ be the distances between the i^{th} capital and the j^{th} base.
Note that during clausewitz, $1 \leq n(D) \leq CB$.

Clausewitz

Clausewitz starts at $t = 0$ and ends at $t = T = 8$ with an **arbitrary** unit of time.

From $t = 0$ to $t = 1$:

The sovereign:

1. **Distributes the military** to each and every capital from the nearest base(s) to that capital. Then the distribution of the military is a **secret** known only to the sovereign.
2. **Grants the charter to kill** to the first military officer ranked below the sovereign.
3. **Grants the charter of bank independence** to the central bank for **war-time banking**.
4. **Grants the charter of justice** to the chief justice ranked below the sovereign.

The military chooses a random base B_{bunker} as the **military bunker for the sovereign and his coterie**.

The central banker chooses a random capital $C_{bank} \neq B_{bunker}$ as the **headquarters of the central bank**.

The chief justice chooses a random capital $C_{court} \notin \{B_{bunker}, C_{bank}\}$ as the **seat of the supreme court**.

From $t = 1$ to $t = 7$:

Note that blitzkrieg does **not** imply nuclear damage from $t = 0$ to $t = 1$, consistent with both peace and clausewitz. Therefore, if the nation has been attacked by an aggressor nation between $t = 0$ and $t = 1$, the attacked nation has the right to implement blitzkrieg from $t = 1$ to $t = 7$.

From $t = 7$ to $t = 8$:

Initiate diplomacy with the aggressor nation to sign peace treaty bound by international law.

The End
