

A medium model of a military-industrial complex

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I describe a medium model of a military-industrial complex.
The paper ends with "The End"

Introduction

The building of a military-industrial complex (MIC henceforth) was known since the Third Reich.
In a previous paper, I've described a small model of a MIC.
In this paper, I describe a medium model of a MIC.

A medium model of a MIC

The set of 25 **vertices** of the MIC numbered
 $\{1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25\}$
represent **various buildings**.

The set of 48 **edges** of the MIC numbered
 $\{1 \rightarrow 2, 1 \rightarrow 3, 1 \rightarrow 4, 1 \rightarrow 5, 1 \rightarrow 6, 1 \rightarrow 8, 1 \rightarrow 9, 1 \rightarrow 10, 1 \rightarrow 12, 1 \rightarrow 15, 1 \rightarrow 16, 1 \rightarrow 20, 1 \rightarrow 25, 2 \rightarrow 1, 2 \rightarrow 2, 2 \rightarrow 3, 2 \rightarrow 4, 2 \rightarrow 5, 2 \rightarrow 6, 2 \rightarrow 8, 2 \rightarrow 10, 3 \rightarrow 1, 3 \rightarrow 2, 3 \rightarrow 3, 3 \rightarrow 4, 3 \rightarrow 5, 4 \rightarrow 1, 4 \rightarrow 2, 4 \rightarrow 3, 4 \rightarrow 4, 4 \rightarrow 5, 5 \rightarrow 1, 5 \rightarrow 2, 5 \rightarrow 3, 5 \rightarrow 4, 5 \rightarrow 5, 6 \rightarrow 1, 6 \rightarrow 2, 8 \rightarrow 1, 8 \rightarrow 2, 9 \rightarrow 1, 10 \rightarrow 1, 10 \rightarrow 2, 12 \rightarrow 1, 15 \rightarrow 1, 16 \rightarrow 1, 20 \rightarrow 1, 25 \rightarrow 1\}$
represent **communication routes**.

Note that 11 buildings are **deliberately** not connected by communication routes.

The End
