

The financial flux of a time-dependent interest rate

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I describe the financial flux of a time-dependent interest rate.
The paper ends with "The End"

Introduction

The concept of **the financial flux of a time-dependent interest rate** is essential to statistics, asset pricing, economics and finance.

In this paper, I describe the financial flux of a time-dependent interest rate.

The financial flux of a time-dependent interest rate

The financial flux of a time-dependent interest rate $i(t)$ is

$$F(i(t)) = \frac{i(t)(1 + i(t))^t}{(1 + i(t))^t - 1}$$

The End
