

# 4 statistical solutions to population inconsistent with the theory of managed economic gearing

Soumadeep Ghosh

Kolkata, India

## Abstract

In this paper, I describe 4 statistical solutions to population  
inconsistent with the theory of managed economic gearing.  
The paper ends with "The End"

## Introduction

In a previous paper, I've described 14 statistical solutions to population  
consistent with the theory of economic gearing.

In a previous paper, I've described 7 statistical solutions to population  
consistent with the theory of managed economic gearing.

In this paper, I describe 4 statistical solutions to population  
**inconsistent** with the theory of managed economic gearing.

## 4 statistical solutions to population inconsistent with the theory of managed economic gearing

4 statistical solutions to population inconsistent with the theory of managed economic gearing are

1.  $p_1 = 33, p_2 = 22, p_3 = 37, p_4 = 62, \mu = \frac{77}{2}, \sigma = \sqrt{\frac{857}{3}}$
2.  $p_1 = 143, p_2 = 45, p_3 = 45, p_4 = 89, \mu = \frac{161}{2}, \sigma = \sqrt{\frac{6499}{3}}$
3.  $p_1 = 259, p_2 = 60, p_3 = 53, p_4 = 19, \mu = \frac{391}{4}, \sigma = \sqrt{\frac{142523}{3}}$
4.  $p_1 = 312, p_2 = 99, p_3 = 89, p_4 = 67, \mu = \frac{567}{4}, \sigma = \sqrt{\frac{156731}{3}}$

**The End**
