

The mathematical theory of the gravitational constant on Earth

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I establish the mathematical theory of the gravitational constant on Earth.
The paper ends with "The End"

Introduction

The mathematical theory of the gravitational constant on Earth is simple.

In this paper, I describe the mathematical theory of the gravitational constant on Earth.

The mathematical theory of the gravitational constant on Earth

The mathematical theory of the gravitational constant on Earth is

$$\mathbf{p_1p_3} - \frac{1}{\mathbf{p_3}} = \mathbf{g} = \mathbf{p_1^{p_2}} + \frac{\mathbf{p_2^{p_1}}}{\mathbf{p_3}}$$

where

$\mathbf{p_1} = 2$ is the first prime

$\mathbf{p_2} = 3$ is the second prime

$\mathbf{p_3} = 5$ is the third prime

$\mathbf{g} = 9.8$ is the gravitational constant on Earth

The End
