## Abstract

In this paper, I describe the G4 graph and its implication.  
The paper ends with "The End"

## Introduction

Whenever there exists 4 **true** nations,  
**the G4 graph** becomes the **holy grail** of international relations .  
In this paper, I describe the G4 graph and its implication.

## The G4 graph

The set of vertices in the G4 graph are  $\{1, 2, 3, 4\}$ .

The set of edges in the G4 graph are  $\{1 \rightarrow 1, 1 \rightarrow 2, 1 \rightarrow 4, 2 \rightarrow 1, 2 \rightarrow 2, 4 \rightarrow 1\}$ .

## The implication of the G4 graph

The implication of the G4 graph is that there can't exist more than 4 **true** nations.

**The End**
