Two designs of a financial district

Soumadeep Ghosh

Kolkata, India

Abstract

In this paper, I describe two designs of a financial district.
The paper ends with "The End"

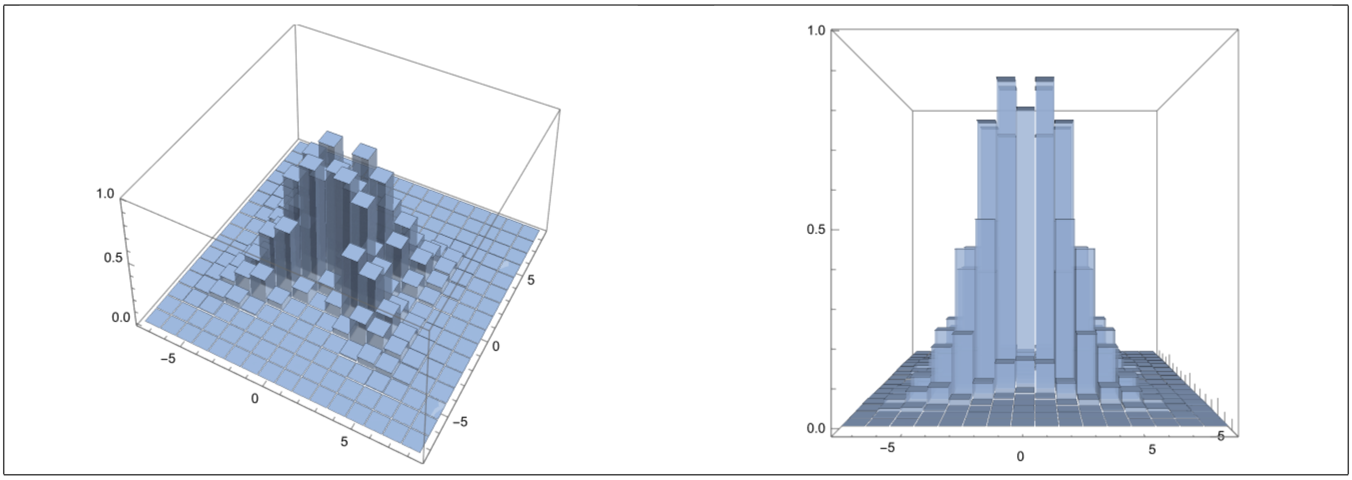
Introduction

Knowledge has been demanded of me for the design of a financial district.
In this paper, I describe two designs of a financial district.

Design of a financial district

A **financial district** can be designed using any multivariate probability density function.
In this paper, we use the multivariate Poisson probability density function to produce two designs of a financial district.

The clustered design of a financial district



The crossed design of a financial district
